

# Severe Adverse Effects

- lymphopenia / Delayed / 40.0-40.0
- angioedema / Rapid / 11.0-11.0
- bronchospasm / Rapid / 8.0-8.0
- neutropenia / Delayed / 6.0-6.0
- leukopenia / Delayed / 4.0-4.0
- pancytopenia / Delayed / 3.0-3.0
- anemia / Delayed / 3.0-3.0
- thrombocytopenia / Delayed / 2.0-2.0
- cytokine release syndrome / Rapid / Incidence not known
- acute respiratory distress syndrome (ARDS) / Early / Incidence not known
- bronchiolitis obliterans / Delayed / Incidence not known
- ventricular tachycardia / Early / Incidence not known
- heart failure / Delayed / Incidence not known
- myocardial infarction / Delayed / Incidence not known
- ventricular fibrillation / Early / Incidence not known
- aplastic anemia / Delayed / Incidence not known
- hemolytic anemia / Delayed / Incidence not known
- red cell aplasia / Delayed / Incidence not known
- hepatitis B exacerbation / Delayed / Incidence not known
- hepatic failure / Delayed / Incidence not known
- toxic epidermal necrolysis / Delayed / Incidence not known
- pemphigus / Delayed / Incidence not known
- anaphylactoid reactions / Rapid / Incidence not known
- Stevens-Johnson syndrome / Delayed / Incidence not known
- anaphylactic shock / Rapid / Incidence not known
- oliguria / Early / Incidence not known
- nephrotoxicity / Delayed / Incidence not known
- hyperkalemia / Delayed / Incidence not known
- renal failure (unspecified) / Delayed / Incidence not known <sup>[1]</sup>
