

Renal Replacement Therapy

Adults:

→ *Dose in patients undergoing renal replacement therapy:*

APD/CAPD: Not dialysed. Contraindicated.

HD: Dialysed. Haemodialysis clearance is 38–40 mL/min. 50% of normal dose at least 12 hours before next dialysis. Use with caution.

HDF/High flux: Dialysed. 50% of normal dose at least 12 hours before next dialysis. Use with caution.

CAV/VVHD: Unknown dialysability. Dose as in GFR=10–20 mL/min.
